

Statement of Sustainability

At ILS we are striving to create a sustainable future for all living things. In order to do this, we:

- Do not supply disposable drinking water bottles.
- Try to use our own bottles or coffee cups instead of disposable ones.
- Recycle about 80% of our trash. (two semi-tractor loads over the last 16 years)
- Use compostable coffee pods instead of Keurig ones. 10 billion Keurig pods go into the landfill every year.
- Compost all coffee and tea pods.

Also, in the last year, we have raised over \$100,000 to protect the Mayan Rainforest in Belize. We will continue to raise money to protect these valuable habitats for as long as we are in business.
